What is Acquire?

Powerful graphics, superior interactivity, real-time information streams, cutting edge functionality and higher resolution media - this is the age of digital. Make sure your business doesn't get left behind.

Providing the most comprehensive and versatile solution available for digital signage and interactive kiosk networks, Acquire PREMIER has an unbeatable reputation.

Part of the award-winning suite of Acquire software products currently installed on more than 15,000 players worldwide, this innovative software package is ideal for complex situations or the largest of rollouts offering unrivalled content control, design capability and functionality for both networked and stand alone installations.

Stay one step ahead of the competition with advanced and multi-network features **including:**

Page Designer

Create templates, set up interactive hot spots, define trigger events and much more with the WYSIWYG Page Designer. Giving you the freedom and flexibility to fill your screens with a wide variety of media and messages, you can add, modify and control different types of rich media, or combine them with live data sources and other player generated information with total control.

Script Editor

A real advantage for any digital signage network, Acquire's Script Editor lets you take charge of your playlists to ensure that your content appears when, where and how you want it. Working with your existing design tools rather than replacing them, this flexible software has been designed to help combine material from programs such as Adobe Flash™, Photoshop™, Premiere™ and AfterEffects™ in either an interactive or scheduled way for best play back. Create combinations of times, dates, triggers and controls or sit back and let Acquire do all the hard work for you using pre-set demographics and settings.

"Multi-layered tool for advanced content scheduling."

"Acquire™ is a unique software suite that provides a comprehensive solution for digital signage and self-service kiosk networks."

Scheduler

Want your software to work to your schedule? A great way to assign content, pages or scripts to individual players or groups, the Acquire Scheduler enables you to define demographics, power on/off times, schedule changes and much more before previewing your content live and sending it out.

Player Technology

Take control of your playback with our purpose built player technology, which offers unrivalled high resolution rich media playback. The engine at the heart of our PREMIER software, the Acquire player technology guarantees the best results available on a variety of hardware platforms from 500Mhz systems to full 1080p HD playback.

Site Manager

Keep track of your digital signage or interactive kiosk networks from your desk. Providing comprehensive data and graphical displays in real time, the Acquire Site Manager enables you to monitor the status of content deployments, players or kiosks wherever they are installed.

Reporting

Make sure your digital signage or interactive kiosk network is delivering results. Acquire's Reporting facility provides post play-out reporting via 15 separate report types from system uptime through to daily play-out statistics, and every combination of data in between. You control the information to build detailed reports which can be viewed on-line or downloaded to your PC.
